

Nestled at the foot of the San Bernardino Mountains in an enchanting playground, and overlooking the beautiful San Bernardino Valley is Arrowhead Springs Hotel and one of America's finest Spas. The Arrowhead waters have been known for centuries as superb restorative waters. The world's hottest mineral spring of 202 degrees is located here.

According to a legend, the strange natural formation—void of vegetation—of a giant arrowhead on the mountain side, guided the Indians to these curative springs.
